<https://doi.org/10.1007/s11356-024-34572-4>

In the abstract and in the sections on imported plastic, exported plastic, and generated plastic waste, the following sentences contain incorrect words and numbers: “The daily estimated plastic waste produced per person ranges between 0.012 and 0.056 kg. The estimated amount of plastic waste generated per person per year in Rwanda could be between 4.38 and 20.44 kg. Plastic waste accounts for between 1 and 8% of the total municipal solid waste produced per person per day in the country, which ranges from 219 to 255.5 kg.”

The corrected sentence should read: “The daily estimated plastic waste produced per person could range between 0.0057 and 0.056 kg. The estimated amount of plastic waste generated per person per year in Rwanda could be between 2.0805 and 20.44 kg. Plastic waste could account for between 1 and 8% of the total municipal solid waste produced per person per year in the country, which could range from 208.05 to 255.5 kg.”
